

## Posting bookmarks

Enter the URL, title, tags, and description for bookmarks **Command + I** through **4** or **Tab**

Select the account you wish to post to  
**Command + [ or ]**

The dialog box is titled 'Pukka'. It contains the following fields and controls:

- URL:** A text input field with a lock icon on the right.
- Title:** A text input field.
- Tags:** A text input field.
- Description:** A larger text input field.
- Account:** A dropdown menu currently showing 'incanus'.
- Buttons:** 'Reset' and 'Add Link' at the bottom right.

Save a bookmark so only you can see it **Command + L**

Clear the main window  
and start over **Esc**

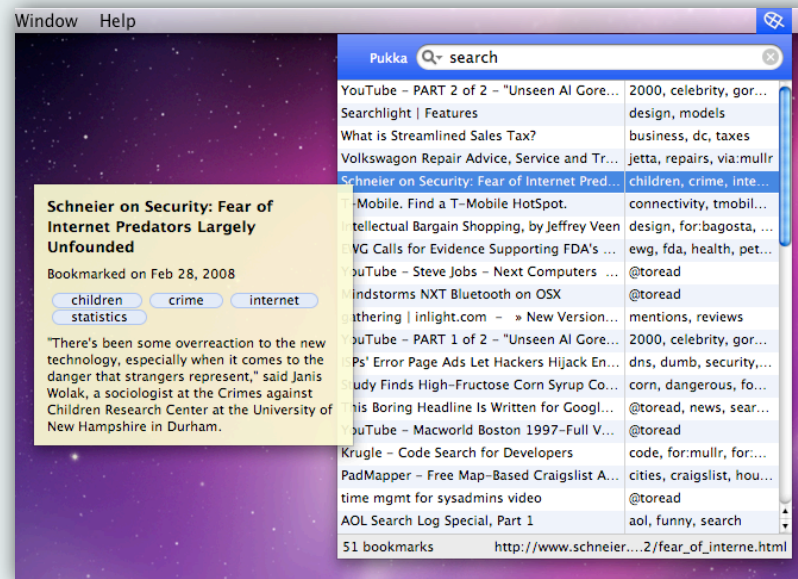

Add the current link to your bookmark collection **Command + Return**  
Hold **Option** when adding to avoid resetting the window

## Searching Bookmarks

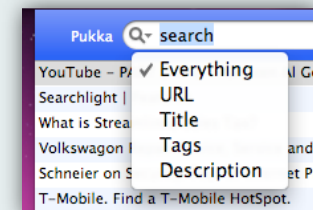

You can assign a custom, **global keyboard shortcut** to access search from any application.

You can also use **Command F** from anywhere within Pukka.

Tooltip for the currently selected search result **Space** or wait a moment

Type your search terms here  
**Tab** between search and results

You can also narrow your search to specific fields  
**Command + [ or ]**

URL of the currently selected search result  
**Return** or **double-click** to open in browser  
Hold **Option** when opening to edit bookmark instead (works in the Dock, menu too)

Total number of search results
